

May 28, 2020

Dear Pathways Students and Families,

It's been really exciting to hear from so many of you lately! Summer classes are going well and it's awesome to see the progress being made. Remember, we need students to be working on their online classes everyday to make substantial progress, and we need to make sure they attend all Google Classroom meetings as scheduled.

Now is the opportunity for students to jump ahead, so make sure to ask teachers for more work if you want to move up your graduation timeline! If you'd like to learn more about this option, contact your teacher.

We are still monitoring the COVID-19 situation, but it looks as though we won't all be in the building together until August. Please remember, however, that we are a year-round school and we need students to strive to complete at least 5 units per month through the summer. Parents, if you're not sure how many units your child is completing, please reach out to me and/or your child's teacher. In order to stay on track, all students should be completing at least 5 units per month. Please contact me if you don't have your contact information for your child's teacher.

We thank you for continued resilience and hard work!

Jon Keith  
Principal
